MEMORANDUM FOR: Chief, School of Intelligence and
World Affairs

SUBJECT : Merger of the Midcareer Course and
Advanced Intelligence Seminar

1. The agenda for the Board of Visitors meeting on
16 May includes the following item:

"Review the purpose and justifications
for Midcareer Course, Advanced
Intelligence Seminar, and the Senior
Seminar with a view to streamlining
and possibly reducing to two courses."

Consequently, I think we had better consider plans for
merging the MCC and AIS while also contemplating the
serious possibility that the merged course may have to
enroll larger numbers of students, including community
students, than the two courses, cumulatively, are able
to accommodate annually at the present time.

2. Additionally, in the light of our discussion
on 9 May concerning "CIA: Today and Tomorrow", please
pursue the matter of providing handouts to students
which describe the organization and basic functions of
Agency components so that speakers may engage more
fully in a give-and-take with the class on current and
future issues.

3. I would appreciate having your proposals for
a merged course, with alternatives as appropriate, at
your earliest convenience.

Alfonso Rodriguez /
Director of Training

STATINTL

MEMORANDUM FOR: [REDACTED]

Don,

Among your other problems with the AIS, MC and SS - please keep in mind that I should perhaps advise Brownman that we plan to drop the Grid from the "front" of the MC. Historically it has not been there from the first - we substituted it for a Brookings Institution unit.

Give me - when you are ready - the rationale (for Brownman) for dropping and whatever else you may know about its future structure.

At your convenience. Thanks.

Rod
